## PROFESSIONAL SUMMARY

I am a Full-stack software engineer with 5+ years of experience designing and building robust applications for high-volume businesses. I have been able to Spearhead several engineering team some are which; a frontend Engineering team that designed and built the Daewoo Nigeria Ltd. in-house Application Software suite, I led and supervised the frontend team that developed the robust Jiffye Inventory and accounting management system. This is to mention but a few. I excel very much in collaborating with cross-functional teams to understand user requirements and create intuitive, user-friendly software solutions not forgetting that I am also a very enthusiastic team player and deep creative thinker. In my free time, I blog and enjoy time with family and friends.
